

Introducing FogiFix® — a unique anti-fog dry wipe

FogiFix® provides immediate and long-lasting anti-fog protection for glasses, goggles, safety shields, car windows, mirrors, refrigerator doors, and more.

FogiFix® is incredibly easy to use

If the surface to be protected is not already moist, then slightly wet the FogiFix® non-woven fabric. Wipe...

and you're done!

Unlike anti-fogging liquids, gels, sprays or wet wipes, there's no mess, no smearing, and no need to dry the treated surface. FogiFix® does not require special storage conditions and provides exceptional anti-fog protection over and over again — from the first use to the last.

Fogged mirror,
not using FogiFix®

FogiFix® Benefits

Immediate, long-lasting anti-fog protection on a wide variety of surfaces

Easy to use — slightly moisten (if the surface is not already moist)

Maintains the same anti-fogging efficacy over many uses

Does not require special storage conditions

Shines glass surfaces

Fogged up lenses or windows are not just inconvenient.
In sports, in the workplace, or on the road, they can also be dangerous.
